

## Press Release

### **SA2WEB24: THE NEW CONTROLLER SPECIFICALLY DESIGNED FOR HOTEL ROOMS AND APARTMENTS**

The cost-effective solution for room management through control, comfort and energy savings.

Lainate, October 2017 - Carlo Gavazzi Automation, the international electronics group with activities in the design, manufacture and marketing of electronic equipment, today presents its new controller SA2WEB24.

Part of the Sx2WEB platform, the SA2WEB24 is a programmable controller specifically designed for home and building automation applications. This controller includes dedicated functions such as light control (DALI), temperature control, roller blind control, alarm and energy monitoring.

The purpose of this launch is to provide a light version of the SH2WEB24 controller for those applications where one Dupline bus is enough and where there are a lot of constraints in terms of cost for the installations.

The SA2WEB24 controller has been enhanced with a new configurable web-app interface, developed using state of the art technology in terms of web-design.

“The launch of this new controller version provides a modular, scalable and cost-effective solution, making this system more attractive to system integrators, also providing significant savings,” says Raffaella Sirena – International Product Manager. “Our intention is to further expand our range of products so as to meet the different requirements from the market.”

Developed by our Competence Centre in Italy, the SA2WEB24 is designed to meet the different needs of control in the home and building automation market, especially in the Asia-Pacific region.

#### **Main technical features**

- Micro PC with web-server
- One Ethernet port
- 15 to 30 VDC power supply
- Dimensions: 2-DIN module
- Programmable by means of the configuration software SA tool
- It can manage 1 SH2MCG24, 1 SH2DUG24 and 1 SH2WBU230N
- All the data from the Dupline buses can be logged
- All data exports on XLSX and CSV format
- Variables shown as graphs
- Event control with automatic e-mailing and SMS management
- Connection to the bus generators via internal bus

#### **ABOUT CARLO GAVAZZI AUTOMATION**

Carlo Gavazzi Automation is an international electronics group with activities in the design, manufacture and marketing of electronic equipment targeted at the global markets of industrial and building automation.

Carlo Gavazzi Automation provides customers with technologically innovative, high quality and competitive solutions, in compliance with their requirements and expectations through its 22 National Sales Companies in Europe, the Americas and Asia & Pacific, operating with its production sites in Denmark, Italy, Malta, Lithuania and China.
